Director Driscoll referenced a presentation by the Lown Institute. They have traditional quality indicators, but also look at measures like civic leadership, value of care, pay equity, community benefits and inclusivity - it is a different way of looking at quality. She urged Directors to visit their website, which contains their Hospitals Index and is very informative. Chair Gugenheim requested that Director Driscoll forward the presentation for the Committee's information.

III. Report on Quality and Patient Safety Matters

A. High Reliability Organization (HRO) Dashboard (continued)

During the discussion of the dashboard, Director Driscoll inquired whether information is available on how CCH compares to other comparable organizations. Ms. Ruhlen responded that she can provide that information.

B. Regulatory and Accreditation Updates – Joint Commission Survey Update (Attachment #3)

Sonya Watkins, System Director of Regulatory Affairs and Accreditation, provided an overview of the Joint Commission Survey Update. The Committee reviewed and discussed the information.

Additionally, Ms. Watkins provided information on a recent unannounced visit at Provident Hospital by representatives from the Illinois Department of Public Health (IDPH), regarding an Emergency Medical Treatment and Labor Act (EMTALA) complaint. She noted that the administration was aware of this particular issue and had self-reported it to IDPH. Opportunities for improvement were identified relating to EMTALA signage in the Emergency Department (ED), maintaining the ED log, making sure that every patient that comes across the threshold is accounted for, and ensuring that there are no delays in the medical screening and treatment they need. Staff are developing a corrective action plan to submit to IDPH regarding these findings.

I am Denise Mercherson, a Medical Social Worker at Stroger Hospital and proud SEIU Local 73 member. This pandemic has shone a light on the failures of our system. We as workers have seen first-hand the missteps CCH has taken throughout the COVID crisis. We do not have faith in CCH creating appropriate solutions; it is up to us as workers and union members to make the right choices. We have raised our concerns about reintroducing elective surgeries and procedures, the state of outpatient care, visitor policy and more. We know a surge is coming and we must prepare for it. PPE, appropriate workload, proper social distancing, universal screening and testing must all be taken into account before moving toward re-opening an already vulnerable county hospital system.

CMS Star Rating

- CMS Star Rating was developed to help **consumers** make more informed decisions about health care by giving them a way to compare hospitals based on **quality** ratings
 - Cook County Health is dedicated to making improvements to the patients we serve and are on the journey of becoming a High Reliability Organization (HRO)
 - HRO Quality Workgroups have been developed (July 2019) that align with the CMS Star metrics and performance improvement processes have been developed

Development of the HRO Quality Domains at CCH

CMS Star Rating Domains

Cook County Health HRO Quality Domains

HRO Domain Metric Development

- Identified metrics for improvement in the CMS Star Rating reports
 - *What was driving the overall performance score in each CMS domain?*
 - Assigned the main indicators to the HRO Quality Domains
- Internal performance monitoring
 - Tracked monthly in “real-time” using Vizient Clinical Data Base, Press Ganey (patient experience), or Business Intelligence (HEDIS)
 - To help drive change, the monthly data is measured against internal goals and an external comparison benchmark
 - 2-year target and stretch goals were set using the SMART principles (specific, measureable, achievable, realistic, time based)
 - The external benchmarking helps to provide realistic targets, define areas of best practice, and identify areas of opportunity

COVID Exposure and Transmission Risk Calculator

The risk of using medical masks instead of N95 masks (or other respirators) for aerosol-generating procedures (AGPs) can be significant even when all patients have a negative COVID-19 PCR test prior to the procedure. While a great many factors will go into this determination, risk can be broken down into two key elements: risk of exposure and risk of transmission. This risk calculator was developed with the hope that organizations will generate their own estimates of exposure and transmission, and share the results openly with stakeholders, including clinicians, so the group can come to a shared decision on whether the risk is acceptably low for clinicians to wear medical masks instead of N95s when conducting AGPs in asymptomatic patients with a recent negative COVID-19 test.”
