**Summary:** Currently, the Department of Animal and Rabies Control (“DARC”) relies upon an aging mainframe solution and isolated manual processes to manage documents and content related to its departmental mandates. The proposed system aims to replace legacy operations with a robust Enterprise Content Management (“ECM”) platform that is scalable and will grow with DARC’s business needs. The ECM is also accompanied by a Responsive Design Web Portal that will render across mobile and desktop devices and transform cumbersome manual processes into automated online services for customers.

The ECM will achieve additional efficiencies by adopting BOT’s Hyland OnBase software standard, which will provide a centralized solution for managing DARC’s internal operations.
