- Developed corporate outreach strategy for Fall Fest, Spring Fling, and 7 other large university cosponsored events, marketing the potential 6,000+ ad impact/ social media impressions

Kyle S. Hanna
University of Chicago
JTDC Advisory Board Candidate
June 4, 2018

To Whom It May Concern:

JTDC could be a launching pad for redirecting community development. My name is Kyle Hanna, Assistant Director for Data Analytics at the University of Chicago. It is with great regret that I could not be present today. But I believe my personal background, experiences working with the DC Mayor's Office, the Obama White House and diverse organizations dedicated to youth of color and community development make me an exceptional candidate for the JTDC board.

Equitable community development is a deep conviction of mine. Originally from West Philadelphia—an area similar to the south side of Chicago—presented a myriad of socio-economic barriers. I credit my success championing these challenges to community mentoring programs, youth development opportunities, and a strong foundational education. Concentrating in economic and community development in university equipped me with a research-based understanding of the consequences trauma, environment, and limited access to opportunity has across communities. Working alongside some of this nation's most passionate community advocates and development practitioners, in Washington DC and Virginia, brought me to serve the most vulnerable in homeless shelters, community centers and schools.

Having early culminating experiences, I went to work in the Office of Planning and Economic Development, on the Deputy Mayor's International Business Strategies team; notably focusing on education and youth immersion programs. Following my work with the DC government, I worked at the Obama White House, on the President Obama's travel team. To support President Obama's initiatives, I often was out in communities connecting with community leaders to understand where support was most needed. In addition to community development, data analytics has been a significant part of my work. A technical understanding of the historical and emerging community problems has changed the way approach development initiatives. During my work at the White House, I partnered with the technology teams working to institutionalize federal progress under the Data Driven Criminal Justice Initiative and the Police Data Initiative. The work Chief Data Officers and data scientists are implementing data driven cost effective approaches. This is why I am most excited about joining the JTDC Advisory Board, bringing data insight to the young people in these facilities.

Currently, I work at the University of Chicago as an Assistant Director of Data Analytics. My past board experience includes the George Washington University's (GWU) Dean's Council of Diversity and Inclusion, the GWU Black Men's Initiative and the Girard College Alumni Association Board of Governors. I hope you consider my application favorably.

You're in Service,
Kyle S. Hanna
