

## **WHY YOUR TRIFE NO-ACCOUNT COUSIN D'JUAN MUST BE COUNTED IN THE 2020 U.S. CENSUS ...**

Your second cousin D'Juan is under house arrest, not looking for a job, with no prospects, and you don't want the census counter to count D'Juan because you 'don't want THE FEDS getting up in my business.'

AND, here's what you're cheating yourself of to sweep D'Juan under the rug:

\*D'Juan is the key to how many congressional districts Illinois gets to keep and expand on as the state loses population. The amount of congressional districts the state gets to keep and expand on determines the amount of Electoral Colleges votes Illinois gets in presidential elections.;

\*D'Juan is also key to how precinct, ward, congressional district, state representative district and state senate district boundaries as drawn.;

\*Most importantly, D'Juan is the key to the amount of local, state and federal funding for your neighborhood.

\*Plus, census notes make some of the most reliable genealogy records for tracking your family history.

**So the next time the census taker comes by where you live, MAKE SURE THEY COUNT D'JUAN!**
