Summary: Max McGraw Wildlife Foundation, Dundee Illinois provides environmental research and monitoring of infectious diseases associated with wildlife species within Cook County. The Max McGraw foundation randomly captures, radio-collars, removes serum samples and ecto- and entero-parasites for disease analysis. Maintains serial serology library to enable the department to graph disease trends and predict outbreaks. Max McGraw monitors contact points between wild animal species and develops mathematical formulations to predict how diseases will spread throughout the wildlife community and to companion animals and humans. The radio-collars with contract telemetry were developed by Max McGraw for use in Cook County's unique ecosystem. The night vision camera were placed after years of experience utilizing Max McGraw captured and collared animals for best visuals of nocturnal animal movements. The radio-tracking devices small enough to attach to bat wings without impairing their flight according to ethical research standards were developed by the Max McGraw Foundation for use in Cook County.
